Mr. Eddie McGlasson
EPA Superfund Division
901 N 5th St.
Kansas City, KS. 66101

RE: Special Waste Disposal Authorization Number 06-0820

THIS AUTHORIZATION EXPIRES September 1, 2007.

Dear Mr. McGlasson :

We have considered your request for disposal of sixteen thousand (16,000) cubic yards of lead contaminated soil from EPA Superfund - United Zinc #1 Site, various locations, Iola, KS. (Analysis provided)

Based solely on the analysis provided, the waste is not a characteristic hazardous waste with respect to the constituents tested. As stated in K.A.R.28-31-4(b), it is the responsibility of the generator to determine whether or not a waste is a hazardous waste by either knowledge of process or by proper testing by a KDHE certified lab. If there are questions as to the status of this waste, the department suggests the facility contact the Kansas Department of Health and Environment Southeast District Office - Chanute at telephone 620-431-2390. **If EPA Superfund Division is confident the material for disposal is not a hazardous waste for any characteristic or listed constituent not included in the testing, the following applies.**

Approval is given to dispose of this waste at the Allen County landfill, operating under Kansas Permit 0101, provided the following conditions are met:

1. Approval to deliver the waste must be obtained from the landfill operator prior to transporting the waste to the landfill. The final decision on whether to accept or reject the waste rests with the landfill operator. Please contact Bill King, Director Public Works, telephone 620-365-1422, to obtain approval. If the landfill operator refuses to accept this waste, you should contact us to determine alternate disposal options.
2. The waste must be transported separately to the landfill and be identified to the operator upon delivery.
3. Kansas Administrative Regulation 28-29-108(r) (12) and (13) requires solid waste disposal facilities to maintain a log of commercial or industrial wastes received such as sludges, barreled wastes, and special wastes. The log must indicate the source and quantity of waste and the disposal location thereof. The industrial waste authorization number should be used as identification when entering the shipment into the log.

Superfund

4. This approval is valid for disposal of the waste described and in the amount shown above. If additional shipments are required, you must contact us to receive another disposal authorization.
5. Operating standards as defined by K.A.R. 28-29-108(k) prohibit the disposal of liquid waste. "Liquid waste" means any waste material that is determined to contain "free liquids" as defined by method 9095A, revision 1, paint filter liquids test, as described in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Pub. No. SW-846 dated December 1996. **For purposes of this disposal authorization, all waste for disposal must be able to pass the "paint filter test".**
6. Any change in the process producing this waste, any change in the materials used in producing this waste or any other change to this waste stream requires that a new Special Waste Disposal Authorization be obtained prior to disposal.

If you have any questions, feel free to contact me at 785-296-1600.

Sincerely,

Tony Guy for
Jim Rudeen, Chief
Bureau of Waste Management
Waste Reduction, Compliance, and Enforcement
